

SAP AI Bundle

Ariba / Strategic Procurement

BUNDLE PREVIEW

7 Modules | 4 Use Case Deep Dives | Core: Rs. 4,999 | Complete: Rs. 7,999

What's in the Ariba + BTP AI Bundle

This bundle covers how SAP BTP AI transforms Strategic Procurement — from GenAI-powered RFP analysis and bid evaluation to ML-based supplier risk scoring and contract compliance monitoring. Built for Ariba and procurement consultants ready to position AI solutions in sourcing environments.

7-Module Curriculum

#	Module Title	What You Will Learn
1	BTP Foundation for Ariba	BTP-Ariba architecture, SAP Business Network APIs, Integration Suite, Event Mesh, and OAuth connectivity patterns
2	GenAI Hub for Sourcing	LLM-powered RFP summarisation, bid analysis, RAG with procurement policy docs, prompt templates for sourcing workflows
3	AI Core for Supplier Intelligence	Supplier risk scoring model, bid price prediction, compliance classifier — training pipeline and deployment on AI Core
4	Build Process Automation	Award approval workflows, contract renewal alerting, bid exception handling — routing rules and Build PA configuration
5	Datasphere for Spend Analytics	Spend cube design, maverick buying detection, supplier concentration analysis, and Datasphere-to-AI-Core data pipelines
6	AI Roadmap for Ariba	Three-phase adoption framework: quick wins in 8 weeks to autonomous workflows at Week 32, with ROI by phase
7	Joule in Strategic Procurement	Joule query library for buyers, category managers, and CPOs — plus building custom Joule skills for procurement-specific intelligence

4 Use Case Deep Dives (Complete Bundle)

Use Case	Description
AI Supplier Risk Scoring	ML model trained on LFA1, BSAK, EKPO, and Ariba SMP API data. Scores every supplier 0-100 with risk tier and rationale. Deployed as REST API on AI Core with scores visible in Ariba supplier profile.
Bid Analysis & Award Recommendation	GenAI Hub reads RFP responses and bids from Ariba Sourcing API. RAG retrieves your evaluation policy. Outputs: weighted bid comparison table, strengths/weaknesses per supplier, and a full award rationale document ready for CPO sign-off.
Contract Compliance Monitoring	AI Core binary classifier detects off-contract spend on every transaction in real time. Trained on EKKO, EKPO, RSEG, and Ariba Contract API data. Off-contract flag triggers Build PA: buyer alert, payment hold, audit trail.
Signavio + BTP AI Closed Loop	Signavio detects sourcing process deviations — single-bid events, bypassed approvals, late award decisions. BTP AI classifies each violation and Build PA triggers the corrective action: hold, escalation, or extended event.

Key S/4HANA Tables Covered

Table	Description
EKKO	Purchasing document header — vendor, org, document type, contract reference
EKPO	Purchasing document item — material, category, quantity, price, delivery
RSEG	Invoice document item — actual billed amounts for compliance monitoring
LFA1	Vendor master general data — supplier profile data for risk scoring
BSAK	Cleared vendor items — payment history for financial reliability scoring
EINA	Purchasing info record — approved vendor-material pricing and contract links

Pricing

CORE BUNDLE — Rs. 4,999	COMPLETE BUNDLE — Rs. 7,999
7 Self-Study Modules with Slide Decks	7 Modules + 4 Use Case Deep Dives + All Slides

Architecture-first. Use-case driven. Built for working SAP consultants.
